

HeartStart First Aid Defibrillators enable virtually anyone to treat the most common cause of sudden cardiac arrest by delivering a shock quickly and effectively, wherever it happens - at work, at play, while travelling - providing the power to save a life.

HeartStart First Aid is designed for the ordinary person in the extraordinary moment. Using clear, calm voice instructions, it guides you through each step of defibrillation, including CPR coaching. Integrated SMART Pads placed on the victim's bare skin sense and adapt the defibrillator's instructions to your actions every step of the way.

### Key Features:

- Semi automatic configuration with a flashing shock button
- Detailed voice instructions guide responder through use of the defibrillator
- Turns on with easy-to-use pull handle
- Infant/Child Electrode capability
- CPR Coaching
- Lightweight, compact and durable
- Apply shock only when it is required
- Extra set of electrodes included
- 5 years warranty

## For the ordinary person in the extraordinary moment

Using the HeartStart First Aid Defibrillator is simple. Pulling the green handle activates the defibrillator and its voice instructions and visual icons. These instructions are paced to your actions, to help guiding you through the entire process - from placing each pad on the patient to delivering a defibrillation shock and performing CPR.

The HeartStart First Aid can be used on patients of any age, including infants and children. HeartStart First Aid senses when the special infant/child SMART Pads Cartridge is installed. It automatically adjusts to a lower energy level more appropriate for infants and children, and also provides coaching for performing infant/child CPR.

### Key Benefits:

#### Simple to Operate

*Turns on, easy to use pull handle*

- Every HeartStart First Aid comes ready-to-rescue. The device is pre-installed in the carrying case and battery and pads are pre-installed in the device. Simply pull the handle on the front of the AED to activate it.

#### Guided Audio Instruction

*Talks you through your training*

- Philips SMART Biphasic therapy uses a unique combination of high current - to maximize effectiveness, and a lower energy dose - to minimise side effects that are harmful to a fragile heart.

#### Built-in Self Test

*Ready when needed*

- Your HeartStart First Aid goes through a 120-point test before it leaves the factory. On the job, it conducts self tests every single day, not just weekly. It performs over 80 different tests in all. Even the pads are tested for readiness.

#### Visual Queues

*Clear and intuitive icon driven operation*

- The HeartStart First Aid graphics-based visual instructions are designed to communicate instantly, with minimum reading and interpretation. Users not fluent in the devices language can follow easily.

## Philips HeartStart First Aid (M5066AABU)
